

# i1Pro 3 from i1Pro 2

Quick take on the enhancements

i1Pro 3

i1Pro 2

## Illumination

### Full Spectrum LED

Increased reliability, longer life, and more consistent measurement over time.

### Tungsten Bulb

Reduced reliability and shorter life-span.

## M0, M1, and M2

### Single Pass

Cuts scan time for M1 & M2 by 50% and improves accuracy.

### Dual Pass

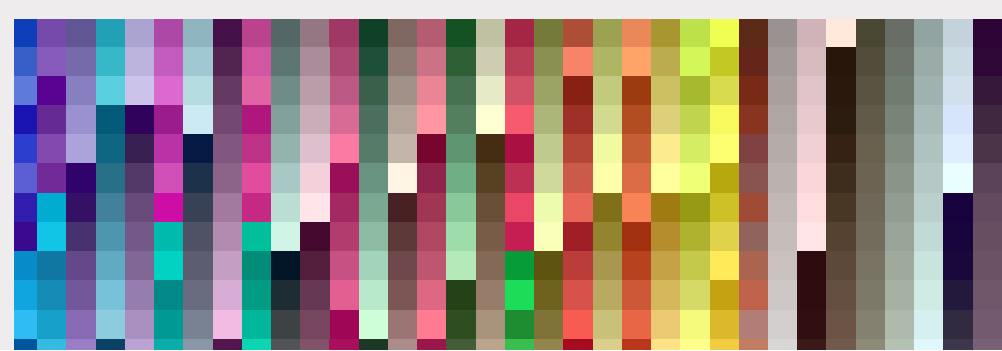

Increases time and reduces accuracy.

## Patch Size

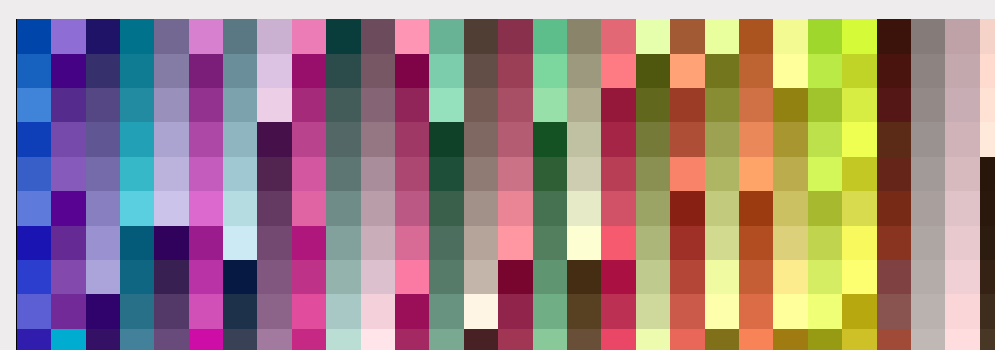

### Smaller

More patches per page means fewer pages to print and scan.

### Larger

Takes longer to scan.

## Display Calibration

### High Brightness

Measures up to 5k NITs for ultra-bright displays.

### Standard Brightness

Measures lower-resolution displays.

## User-Centered Design

### Ergonomic

Easy access for cleaning device for more accurate measurements.

### Awkward

Difficult to clean dust and dirt from optics.
